## INVITATION TO BID #3561-12 CHIP SEAL OIL AND SPREADING

### QUESTIONS AND ANSWERS

April 10, 2012

Q1.) *When will the project start? Will it run continuous after it begins?*

A1.) Project is largely continuous over approximately a 4 week time frame. Typically the last two weeks of July and the first two weeks of August. (We would like the option to purchase Fog Seal at dates throughout the contract duration, but have not done so in the past 4 seasons).

Q2.) *Do you fog same day as chip or not?*

A2.) We fog seal the following day. We only fog a small percentage of our chipseal.

Q3.) *The following products are designated as "soft base": PMCRS-2 and CQS-1. Is that what you really want?*

A3.) The specifications SHOULD be for PMCRS-2h and CQS-1h.

Q4.) *Could you give me the center of mass for determining freight rates to for your chip seal program?*

A4.) 50% to San Luis Obispo City Area and 50% to Templeton Area

Q5.) *Item #15, states that a "10% retention will be withheld until all merchandise has been accepted." How is this provision enforced? What constitutes acceptance by the County?*

A5.) On oil deliveries we pay invoices as they are received. Invoices shall be based on actual quantities as applied from your trucks. Since you will only be invoicing for 100% (Applied to Date) there will be no 10% retention.
